

A MEETING OF THE IMPULSE PROJECT NATIONAL COORDINATORS

01.02.2018 15:56

The National IMPULSE Project Coordinator's meeting was held during the period 30.01 - 01.02.2018. in Gävle - headquarters of Lantmäteriet (the Swedish mapping, cadastre and land registration authority), in the Kingdom of Sweden. Federal Administration for Geodetic and Real Property Affairs on this occasion was represented by Ms. Slobodanka Ključanin - National Coordinator of the IMPULS Project for the Federation of Bosnia and Herzegovina.

At the beginning of the meeting, the national coordinators were informed that the IMPULSE project will be extended for one year - until June 2019. Project status has also been considered since the beginning of the Project (2014) until today. Considering that the Project is extended the participants of the meeting worked on the harmonization of activities for that period. The National IMPULSE Project Coordinator's meeting was primarily used for a comprehensive discussion of proposals for improvement, the alignment of the work plan in the forthcoming period, and discussion on other issues related to further Project implementation. On this occasion, all the co-ordinators gave brief presentations to their colleagues from the region about current activities, initiatives and projects within each agency.

The National Coordinators' Meeting also served as a preparation meeting for the meeting of all directors of Geodetic Administrations from the Western Balkans region with Director of Lantmäteriet, that is scheduled for April 12, 2018 in Zagreb, Croatia.
