

Hardware delivery for the needs of the Federal Administration for Geodetic and Real Property Affairs

17.10.2019 12:11

The procurement and delivery of the hardware equipment for the Federal Administration for Geodetic and

Real Property Affairs needs was completed within the activities of the new donor project and continuation of support of the Norwegian Government through Norwegian Mapping and Cadaster Authority- Statens Kartverk. The Norwegian Government has been supported the Western Balkans countries for many years in preparing and collecting spatial /geographical information as well as establishing services to ensure access to them.

The subject equipment will contribute the improvement of existing capacities of the FGA data center and long-term storage of spatial /geographic data and provide adequate capacity for the distribution system and functioning of the data collection, which the Administration is developing in cooperation with municipalities and other bodies of the Federal Administration.

After the public procurement carried out by the donor, the Norwegian Government through the Mapping and Cadaster Administration - Statens kartverk (SK), the delivery and installation of the equipment will be performed by supplier, Katarina Ltd. Mostar on 17 October 2019.
