

## Three municipalities have been visited

06.07.2016 15:56

Mr. Željko Obradović, director of the Federal Administration for Geodetic and Real Property Affairs, have visited municipalities of Posušje, Grude and Ljubuški on July 05, 2016. During conversation with Mr. Brankom Bago, Mayor of Municipality Posušje, Mr. Ljubo Gizdelj, Mayor of Municipality Grude and Mr. Nevenko Barbarić, Mayor of Municipality Ljubuški, satisfaction with the implementation of the project "Real Estate Registration" was expressed as well as other activities in these municipalities.

Given the current state of Land Administration progress on this field has been evident, both in cadastre register and land registry books, as well as working conditions and equipment. In the Municipality of Posušje, harmonization of data in five cadastral municipalities is in process and establishment of land registry book for the whole municipality is planned.

Interior decoration for land registry branch in the Municipality of Posušje was agreed and vectorization-

development of real estate cadastre data base is in progress. In municipality Grude within the Project cadastral office was renewed and next year activities regarding completion of real estate cadastre establishment will begin for the greater part of the Municipality of Grude. In the Municipality of Ljubuški activities regarding harmonization of cadastral and land registry data is completed in four (priority - cadastral, town municipalities) and later this year activities will start in another five cadastral municipalities (Otok, Šipovača, Veljaci I, and Veljaci II and Vojnići-Dole)

In all three municipalities activities regarding address register establishment are in progress and cooperation with the Federal Geodetic Administration will continue in order to complete these projects entirely. Cadastre and land registry offices are equipped with high-quality equipment and conditions for higher quality services to all users of the cadastral and land registry data have been created.
