Workshop within the DELEF project

21.02.2025 13:24

From February 18 to 20, 2025, a professional workshop was held in premises of the Federal Geodetic Administration within the planned activities of the Swedish donor project DELEF (Digital Enhancement of Land Management for the EU Future of Bosnia and Herzegovina). The workshop was organized within Component 4 "Geodetic Infrastructure".

The workshop was attended by representatives of the Federal Administration for Geodetic and Real Property Affairs and Swedish experts for basic geodetic works. The main goals of the workshop were to present the entire transition procedure to the new reference systems that the Swedish experts went through, as well as the method of their maintenance.

Through various discussions, the participants exchanged information about geodetic systems, regulations for performing geodetic measurements and users of these products. Previous works on the geodetic infrastructure were presented, and further steps were agreed upon.
